# GLOBAL GEOMAPPING SOLUTIONS

Where Data Meets Direction

971 58-286-9903

[info@globalgeomap.com](mailto:info@globalgeomap.com)

Abu Dhabi – UAE

At Global GeoMapping Solutions in Abu Dhabi, we specialize in transforming as-built drawings into high-quality GIS data for infrastructure and landscape projects, ensuring accuracy, reliability, and value for every client.

# ABOUT US

A Brief Story About The  
Company

At Global GeoMapping Solutions, we go beyond simple reviews, Global GeoMapping Solutions is a trusted GIS data conversion and mapping service provider. We are dedicated to delivering precise, high quality geospatial solutions that transform traditional as-built engineering drawings into intelligent GIS datasets. Our services are designed to empower infrastructure development, asset management, utility planning, and smart city initiatives across the region.

With a strong foundation in both geospatial technologies and engineering practices, our team brings together experienced GIS specialists, CAD technicians, and data analysts who understand the technical demands and regulatory requirements of today's infrastructure projects.

At Global GeoMapping Solutions, our core values are precision, compliance, reliability, and timely delivery. Every project is approached with attention to detail and a strong commitment to helping our clients make informed, data-driven decisions that shape the future of urban infrastructure and development. We help clients ensure accuracy, compliance, and smooth project handovers, giving stakeholders the confidence their data is reliable and approved by professionals. We are guided by unwavering core values: precision, compliance, reliability, and timely delivery. These principles shape everything we do and define the quality of our work. We approach every project with meticulous attention to detail, ensuring that each dataset and map we produce meets the highest standards of accuracy and integrity. Our commitment goes beyond just delivering data, we aim to empower our clients with actionable insights that enable confident, data-driven decisions.

# KEY FACTORS

Discover the core elements that drive our daily performance and service excellence.

01

## Precision GIS Mapping

Most of people often explain the key factor depends on delivering accurate spatial data that supports essential planning and development processes.

02

## Advanced Tech

Most of people often explain the key factor depends on using modern surveying tools and digital solutions to enhance mapping and project outcomes.

03

## Client Collaboration

Most of people often explain the key factor depends on strong communication that ensures project requirements and data needs are clearly understood.

04

## Quality Assurance

Most of people often explain the key factor depends on reliable verification methods that maintain consistency across all mapping and survey outputs.

05

## Professional Expertise

Most of people often explain the key factor depends on experienced teams that manage diverse GIS, surveying, and geomatics service demands.

06

## Sustainable Solutions

Most of people often explain the key factor depends on providing environmentally responsible practices that support long-term spatial planning.

# PROBLEMS

Understanding the core challenges is essential before planning any effective solution. This stage helps us define the root issues that influence project outcomes, decision-making, and long-term strategies. Without identifying these problems clearly, operations can become inefficient, misaligned, or difficult to manage. By recognizing key obstacles early on, we set a strong foundation for delivering accurate results and meaningful impact.

## Community Needs

Recognize broad social challenges that influence development and mapping requirements. This understanding allows our work to remain aligned with public needs and long-term growth.

## Environmental Concerns

Consider how natural elements affect land, planning, and resource use. Our approach ensures that environmental factors are part of every assessment and decision we make.

## Global Disruptions

Acknowledge external events and rapid changes that can shape project timelines and priorities. By adapting quickly, we keep our work focused and responsive to shifting conditions.

# SOLUTIONS

## A Brief Story About The Solutions

Our solutions are designed to transform raw spatial information into clear, actionable insights. With advanced mapping technologies and precise data workflows, we address core project challenges and deliver outcomes that support smarter planning, development, and decision-making.

## Data-Driven Project Implementation

We use accurate geospatial data and reliable mapping methods to guide each stage of project execution. This structured approach ensures clarity, eliminates guesswork, and supports consistent results.

## GIS & Survey Integration

By combining GIS analytics with on-ground surveying, we create comprehensive spatial models that improve visibility and understanding. This integration supports better planning and reduces project uncertainties.

## Smart Environmental Mapping

Our solutions incorporate environmental data to help identify risks, constraints, and opportunities. This process aids clients in making informed decisions while meeting sustainability requirements.

## S

### Strength

- High Accuracy GIS Data
- Delivering precise spatial data using advanced GIS.
- Experienced Technical Team
- A skilled team of GIS analysts, and CAD experts with strong UAE project experience.
- End-to-End Mapping Solutions
- Providing complete services from data collection to processing, analysis, and final deliverables.

## W

### Weakness

- High equipment and technology maintenance costs
- Projects may require longer processing time depending on data complexity
- Dependence on field conditions which can cause delays
- Regulatory requirements that may slow certain project approvals
- Client-Focused Approach
- Ensuring timely delivery, tailored solutions, and seamless coordination with government and private clients.

## O

### Opportunity

- Growing demand for digital mapping and geospatial analytics
- Expansion of smart city and infrastructure development projects
- Increasing need for precise land data in government & private sectors
- Adoption of drone and remote sensing technologies across industries

## T

### Threat

- Rising competition in the mapping and surveying industry
- Frequent regulatory changes affecting land and data operations
- Rapid technological shifts requiring constant upgrades
- Environmental factors that may impact field survey operations

# OVERVIEW

We are a professional geospatial solutions provider specializing in GIS mapping, land surveying, drone imaging, and spatial data analysis. We support organizations, developers, engineers, and government sectors by delivering accurate, reliable, and technology-driven geographic information. Our work helps clients plan smarter, manage land more effectively, and make informed decisions with confidence.

## Mapping & GIS Intelligence

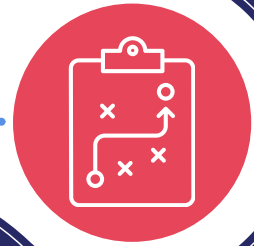

Global GeoMapping Solutions delivers high-precision Mapping and GIS Intelligence to support informed decision-making across infrastructure, utilities, and urban development projects. Our team specializes in collecting, analyzing, and visualizing geospatial data using advanced technologies such as remote sensing, and GIS modeling. We transform complex field data into clear, actionable maps that help clients plan, design, and manage their assets with confidence. With a focus on accuracy, reliability, and innovation, we provide geospatial insights that enhance project efficiency and long-term sustainability.

# ROADMAP

## ★ Planning

Understand project needs and site requirements.

## ★ Data Collection

Survey the area and capture accurate geospatial data.

## ★ Processing & Mapping

Analyze data and create detailed maps and reports.

## ★ Delivery & Support

Provide results, guidance, and ongoing project assistance.

# COMPLETED PROJECTS

Our portfolio reflects our commitment to delivering accurate geospatial data and reliable surveying solutions across a variety of development projects. Each project demonstrates our ability to support large-scale planning, land assessment, and infrastructure enhancement with precision and efficiency.

- 01 **Banias Parks – Package 11 & 12 (6 Parks)**
- 02 **Landscape Works for Commercial Strip Project -Khalifa City Package-A Contract No- DMT-CR-099- 2024**
- 03 **Public Realm & Landscape Construction Works for Package 2-Beach and Marina District in Saadiyat Island**
- 04 **Beautification of Al Reef Bridge Area**
- 05 **Riyadh City Developement - Infrastructure & Streetscape - Phase-7B**
- 06 **Al Shamkah Parks – Phasse2- Package-16 (G2, G3 & G4)**
- 07 **Sheikh Khalifa Highway Beautification Landscape Works**
- 08 **Riyadh City Development - Infrastructure & Streetscape - 6B & 6A Stage 3 (Scope of Work- Stormwater GIS, 6A & 6B)**
- 09 **Saadiyat Island Widening of Jacques Chirack Road and Junctions Modification+-Package 1A**
- 10 **Consultancy Services for Study and Design of Abu Dhabi Cycling Network Mainland Abu Dhabi (20220311)**
- 11 **Saadiyat Lagoons District-Package 1 Design & Build Infrastructure, Marine & Public Realm Work Contract No-P151108/2022/C/008**

# MARKET VALIDATION

The growing demand for accurate spatial data and advanced geospatial solutions validates the strength and relevance of our services in today's market. With rapid urban development, infrastructure expansion, and the increasing adoption of digital mapping technologies, organizations require dependable partners who can deliver precise, timely, and cost-effective geospatial insights.

Global Geo (We) meet this need by providing high-quality surveying, GIS mapping, and data analysis that support decision-making across government, construction, engineering, and environmental sectors. Our successful projects and consistent client satisfaction demonstrate our ability to serve real-world market demands and adapt to evolving industry requirements.

From public park developments to large-scale commercial and residential projects, our work continues to prove its value by enabling smarter planning, improved resource management, and more efficient project execution. The market's reliance on accurate geospatial information confirms the essential role we play—and reinforces the growing opportunities for continued expansion and innovation within our field.

# TEAM

We believe that exceptional results come from collaboration. That's why our surveyors, GIS analysts, drone specialists, and project managers work closely together to provide seamless workflows and efficient solutions—from field data collection to final map production.

Driven by innovation and a commitment to excellence, our team adapts to new technologies, continuously upgrades its capabilities, and remains focused on delivering value for every client. With a strong work ethic and a shared vision, the Global Geo team transforms complex geospatial challenges into clear, actionable insights that support progress and development.

# THANK YOU

Thank you for taking the time to learn about Global GeoMapping Solutions and the services we provide. We appreciate your interest in our work and the solutions we deliver across the geospatial, surveying, and mapping sectors. Your trust and attention inspire us to continue offering accurate, reliable, and innovative results for every project.
